Mask4allMalawi

Dear Conor,

RE: DISTRIBUTION OF CLOTH MASKS IN NKHOTAKOTA DISTRICT

With much gratefulness for your mask donation we write to give you an update that we have started distributing the masks to 'Thandizo Children' at our HIV Centre, their guardians and communities during outreach mobile clinics in the district.

At every distribution, during health education session, our Clinicians and Nurses take turns in teaching the beneficiaries on how to wear and wash the masks as well as who and when should wear them. So far, the initiative has immensely been received by the communities. People are happy receiving the masks and they understand their responsibility in preventing the spread of the pandemic. We have so far distributed 700 masks and since the exercise is gaining momentum by each day with some more people coming to ask for them, we are expecting to finish the first consignment in 3 weeks' time.

We promise to continue distributing the masks and hope the exercise will go on smoothly as it has begun.

We look forward to a continued partnership in preventing the spread of Covid-19 pandemic.

Stay safe.

Luciano Tiferankhani
